PROFESSIONAL SUMMARY

Currently pursuing a Master's in AI Engineering at ISEP. I am a proactive and responsible professional with strong organizational skills and a proven ability to work effectively in multidisciplinary teams. Experienced in developing end-to-end applications (Flutter, Firebase, FastAPI) and complex AI-driven solutions. I am highly motivated to contribute to innovative tech teams, offering quick problem-solving skills and a fast learning curve for new environments and technologies.

TECHNIQUE SKILLS

- **Development Languages** : Dart, Python, C/C++, JavaScript, TypeScript, SQL.
- **Mobile & Web**: Flutter, Next.js, FastAPI, Django, Flask, Firebase, Supabase, HTML/CSS.
- **IA & Hardware**: Computer Vision (OpenCV, YOLO), Neural Network, Microcontrollers, FPGA, Raspberry Pi.
- **Tools & OS**: Git, GitHub, Linux, UI/UX Design, Microsoft Office
- **Languages**: Português (Native), English (Intermediate)

PROFISSIONAL EXPERIENCE

Intelligent System for Tool Control and Asset History Management – in partnership with GASMAR Natural Gas (Nov 2025 – Apr 2026):

- Developed a robust API using Python (FastAPI), structuring modules for asset movement, product control, SQLite database management, and secure JWT-based authentication. Built responsive web interfaces for the control panel and user profile pages using Next.js, TypeScript, and modern styling practices.
- Integration & Automation: Implemented Python scripts to automate RFID tag generation and inventory data loading, integrating hardware identification with the management system.

Project Manager & Lead Developer

- **IFClube**: Developed a full integration platform using Flutter and Firebase to enhance student collaboration. Led development teams, coordinating tasks and ensuring high-quality delivery under tight deadlines. Managed the full lifecycle of applications, from database modeling to UI implementation.

AI Technical Assistant (Computer Vision & Embedded Systems)

- **Traffic Monitoring**: Configured AI environments on Raspberry Pi 4 B for automated vehicle monitoring using YOLOv8 and OpenCV.
- **Health Monitoring**: Integrated biometric sensors with FPGA and BitDogLab for real-time vital sign processing.

Mobile Developer

- **Connect IFMA**: Implemented features for an academic social network, focusing on backend integration with Firebase.
- **TransportelF**: Developed authentication and ticketing systems for a driver-passenger app, prioritizing user experience.

EDUCATION

- **M.Sc. in Artificial Intelligence Engineering** | ISEP, P. Porto (In progress).

- **B.Sc. in Computer Science** | IFMA, Brazil (In progress - Dual Degree).
- **Professional Residency in Embedded Systems** | IFMA (Completed 2026).
- **Professional Training in Embedded Systems** | IFMA, Brazil (Completed: Feb 2025).
- **High School Diploma** | Colégio Militar Tiradentes IV (Completed 2020).
